

Puyallup Station Parking Expansion

The expanded, upgraded parking lot at 5th St. SW is just minutes from the Puyallup Sounder station. The lot added drainage, new lighting and environmentally sustainable rain gardens. The 219-space satellite lot was built in response to high demand for more parking serving Puyallup Station.

Four uniquely engineered rain gardens capture storm water run-off from the lot's paved surfaces. The system mimics natural hydrology by using a specially designed soil that allows maximum infiltration of storm water while providing a nutrient-rich environment for plants. Storm water that does not infiltrate the soil will be stored in a large detention system under the parking lot.

Mode

Commuter rail

Highlights

Start of service: 2010

Location: Puyallup Fair & Events Center's Red Lot at 5th St. SW and 9th Ave SW

Budget: \$2.8 million

Funding partners: Sound Transit, City of Puyallup, Washington State Department of Transportation, the Federal Transit Administration

Planning partners: Sound Transit, City of Puyallup, Pierce Transit and Puyallup Fair & Events Center

Consultants & contractors

Preliminary engineering, environmental documentation, final design: INCA Engineers Inc.

Construction: Construct Co.

Construction management: KPFF
